

THE NEW
REFMATE
SIMPLY BETTER MEASUREMENTS

www.refmate.ch

THE NEW REFMATE – PRECISE. SMART. INDISPENSABLE.

The name REFMATE comes from the English word MATE [meit], meaning companion, buddy, the person helping you as you work. And that's exactly what the REFMATE is – the best assistant at work you could imagine. Always accurate, always on hand, always ready to go, robust, versatile, easy to use.

REFMATE-4

TYPICALLY SWISS

A very precise all-rounder

Here in Switzerland, we're pretty good at certain things – quality, accuracy, reliability – making the REFMATE truly Swiss.

The REFMATE has been developed by professionals, for professionals. With state-of-the-art technology wherever high-tech means real improvement. And with tried-and-tested features if they have benefits in daily use. That's

why, instead of a touch display, the REFMATE has sturdy, intuitive buttons and an easy-to-read colour display with an analogue pointer. It's practical too – the REFMATE can be locked for long-term measurements on construction sites.

EVERYTHING AT A GLANCE

LET THE REFMATE
SHOW YOU THE WAY

Flexible, durable, versatile:
the REFMATE has all the features
you need in the workplace.
The most important functions at
a glance:

WELL-STRUCTURED

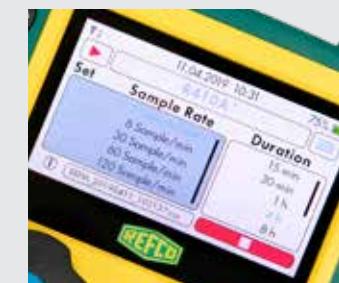

The large colour display shows
measured values in either
analogue or digital format.
The pointers react sensitively
and in real time.

COMMUNICATIVE

The REFMATE connects different
peripheral and measuring
devices with the REFMESH app.

RECEPTIVE

Long-term logging data and
maintenance activities are
automatically stored in the
REFMATE and documented in
the REFMESH app.

QUICK

Access the most relevant refrigerants by setting favourites.

UP-TO-DATE

Refrigerant and software updates can be carried out independently and free of charge.

PRECISE

The sensor's high level of accuracy is complemented by the compensation of the temperature measurement errors on the tube.

ADAPTABLE

The display's screen settings can be easily adjusted depending on the light conditions and environmental factors.

FULLY CONNECTED

The REFMESH app - an IoT platform

Because everything is connected to everything, we've developed a new app called REFMESH. As an IoT platform, the software connects a large number of peripheral devices with the REFMATE.

Data can be stored in the REFMATE, in the app and in the cloud, and can be made available in various formats to other users or customers.
